

# **Inventory of the Llewellyn Collection**

## **Table of Contents**

Overview of the Collection  
Scope and Contents of the Collection  
Arrangement of the Collection  
Organization of the Collection  
Administrative Information  
Detailed Description of the Collection

## **Overview of the Collection**

Creator: Dr. Craig Llewellyn, former Chair of the Department of Military and Emergency Medicine, USUHS  
Title: Llewellyn Collection  
Date: various  
Quantity: 32 boxes

## **Scope and Contents of the Collection**

The collection consists of papers relating to the day-to-day operation of the Department of Military and Emergency Medicine (MEM) during the tenure of Dr. Llewellyn, including course curricula, memos, and meeting minutes, as well as local and international military medical conference information (programs, agendas, etc.). Also included are papers related to telemedicine and the USUHS closure attempts. Collection contains mostly manuscripts and a few color slides. **Includes Law Enforcement Agency (LEA) Sensitive Material (Restricted Access).**

## **Arrangement of the Collection**

Follows creator's arrangement system as much as possible, with some exceptions. Course curricula and conference information arranged in chronological order.

## **Organization of the Collection**

The records are organized into the following sections:  
Telemedicine  
Course Curricula and Materials  
Field Training and Exercises  
Combat Casualty Courses

Military Medical Conferences  
Military Unique Curriculum  
LEA Sensitive Material (Restricted Access)  
USUHS Closure  
MEM Projects  
MEM Information  
International Military Medicine  
After Action Reports

## **Administrative Information**

### **Restrictions:**

**LEA sensitive material**

### **Accession Information:**

Accession number: CL01

### **Processing Information:**

Processed by: Karen L. Caron and Cathy Fauver, 2001

## **Detailed Description of Collection**

**Telemedicine:** The use of medical information exchanged from one site to another using electronic communications for the health and education of patients or providers and to improve patient care.
